

# **EPU 40**

### **Alternative Designations**

## **Key Features**

Elastic Polyurethane

Elastic both under tension and compression • High tear resistant • Low resiliency

# **Description**

This material is a polyurethane elastomer with an exceptional balance of properties. It offers high abrasion resistance, good tear strength, low compression set, and high resilience. EPU 40 is also UV stabilized and has excellent weathering resistance. It is widely used in applications such as gaskets, seals, and high-stress components.

## **Mechanical Properties**

Tensile modulus	8 MPa
Tensile strength	19 MPa
Elongation at break	400%
Hardness (Shore A)	71 – 72

## **Physical Properties**

1.03 g/cm <sup>3</sup>
